

DELIVERABLE REPORTING

Multipurpose hemp for industrial bioproducts and
biomass

(Ref n. 311849)

WP1 – Heteroduplex mapping to improve hemp target traits

Deliverable 1.8 “Retting characterisation of new fibre
varieties from HDM characterised”

Lead partner: UoY

Dissemination level: PU

Delivery date (proj month): 46

As we did not obtain the homozygous line for the pectin mutants, no retting
characterization could be evaluated (see reports for further information).
